

Intel® GPA Workflow Overview

Роман Хатько, Intel

We have the app to optimize your games!

Intel® Graphics Performance Analyzers (GPA)

For Windows and Android games!

Windows
Gaming

OS support

- Win 7, Win 8.1 64bit

DirectX

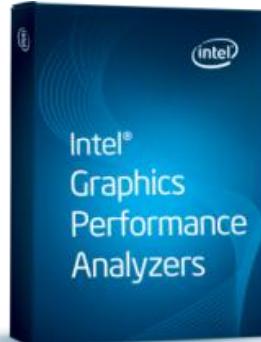

- DX 9.x, 10.x, 11.x

Hardware

- DirectX 9-compatible GPU or newer

Extra

- HTML5 in browsers
- Windows UI apps

Android
Gaming

Host OS

- Windows, Linux, MacOS X front-end

Android OS

- 4.x

Hardware

- Intel ™ Atom-powered Android device

OpenGL ES

- 1.x, 2.x

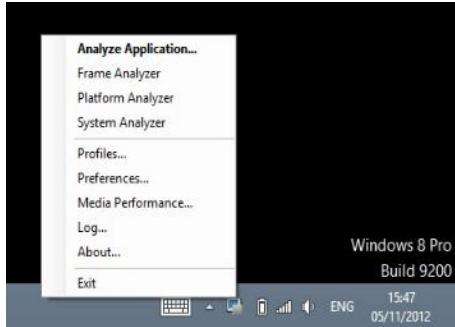

Intel® Graphics Performance Analyzers (GPA)

What's inside?

GPA Monitor

GPA configuration tool
Analysis starting point
HUD profiles
Settings

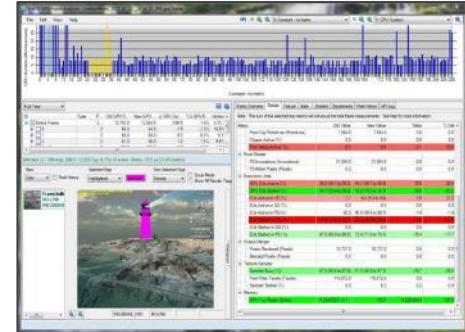

System Analyzer / HUD

Real-time analysis
Frame-rate and metrics
Overrides
Frame/Trace capture

Frame Analyzer

Frame-level analysis
Draw-call bar-char
DX GL ES resources
Metrics, experiments

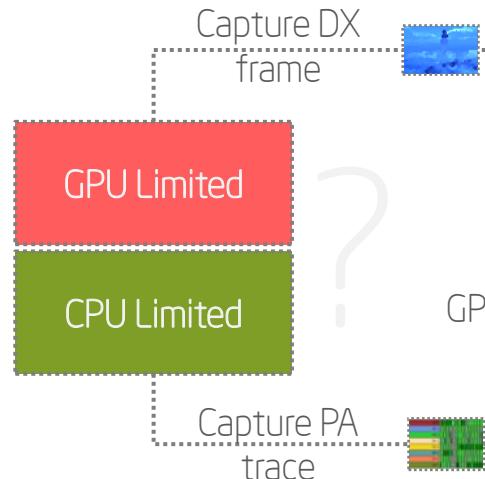

Platform Analyzer

Visual tasks timeline
GPU / DX frame graph
DX / CPU tasks
ETW tasks

Workflow

Game with HUD / System Analyzer:
Real-time in-game Analysis / Experiments

Frame Analyzer:
Deep frame-level Analysis / Experiments

Platform Analyzer:
GPU / DX / CPU tasks visual timeline

1 Run with the tool

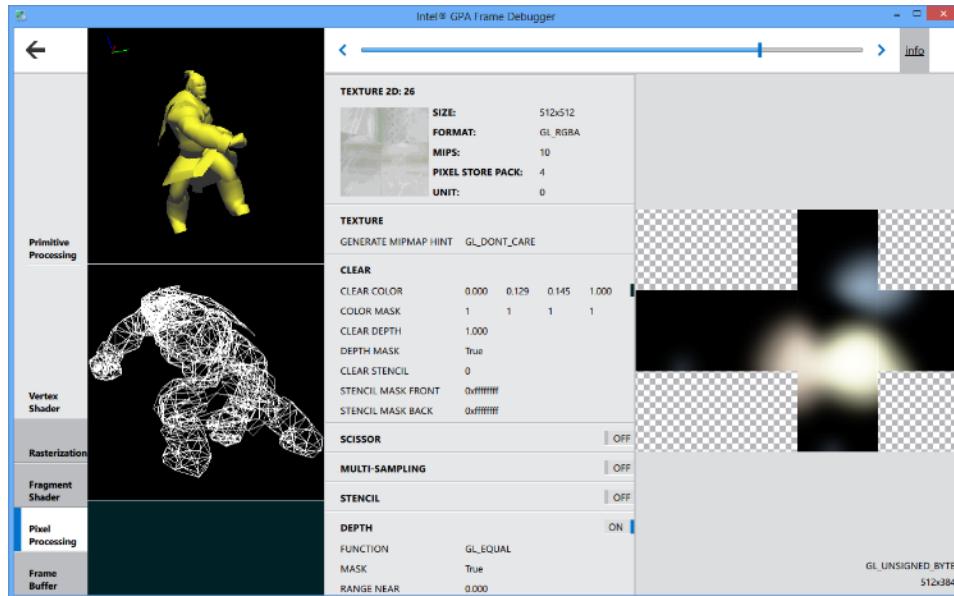

2 Find main limiting factor

3 Do detailed analysis

Intel® GPA Frame Debugger

 <http://intel.com/software/gpa>

Debugging on Android

- An easy way to debug rendering problems in OpenGL ES games
- Quick test for portability issues
- Supports GL ES 1.x, 2.0
- Runs on Windows
